```

1. Look and learn beyond the classroom.

By looking and learning beyond the classroom we offer our pupils opportunities to explore the wider community by means of: charity work; partnership with the elderly through regular visits to residential homes and enterprise opportunities. Due to the rural location of our school, we embrace outdoor learning to develop pupils' skills

2. Aim high so everyone can

By aiming high we demonstrate high aspirations of teaching and learning in all areas of the curriculum. A strong emphasis is on key transferrable skills that can be built upon and developed over time. We embrace children's individual talents and abilities, and aim to inspire a positive attitude towards the whole curriculum.

3. Care, share and belong.

By caring, sharing and belonging we provide a welcoming and supportive learning environment in which each pupil flourishes. Risk taking and resilience building is encouraged. We pride ourselves on our rich citizenship curriculum that promotes positive emotional health and wellbeing.

4. Lead, teach and learn with

By leading, teaching and learning with passion we believe that ALL staff are role models when injecting passion into our curriculum. We have subject specialist teachers for music, MFL and art. A collaborative approach to curriculum design is adopted, and we place a high emphasis on pupil voice in this. All children participate in the Young Leaders Award, which teaches them teamwork, kindness, perseverance and action.
