

6th January 2025

Dear Parents and Carers

Re: Lego Workshop: Tuesday 11th February 2025

To land our current topic 'Tomorrow's World' which started in the new year, we have booked a Creative Builders LEGO workshop for children in Conkers and Oak Trees classes. This will be an excellent conclusion to the topic.

The workshop will guide the children into building different types of homes, businesses and places of worship. As well as this, pupils will be challenged to be inclusive of others through mutual respect by team building. The Electro City workshop uses LEGO bricks to enable pupils to work creatively.

Pupils can work as individuals, pairs or in small teams collaboratively to design buildings and cities. They will learn about circuits and construct a series circuit to light up a light bulb in their own building. Pupils will use switches, buzzers and motors and explore their various functions.

The charge for this exciting experience will be £10 per pupil. This will appear on your child's ParentPay account in due course.

Thank you for your continued support in enriching our students' educational experiences.

Kind regards

Susie Kemp
School Administrator
