In Reception, we want all children to acquire key foundational knowledge alongside their phonic and mathematical knowledge. Below is some of the essential knowledge that our children need to succeed in their next stage of education and life.

Reception - Autumn 2

Key Knowledge

I am beginning to use new vocabulary from stories, songs and topic work.

I can move my body in different ways, exploring balances, shapes and movements through gymnastics and dance.

I know that people from different religions and communities celebrate special times and that these celebrations are important to their beliefs and traditions.

Maths

I know that numbers can be made up in different ways. I can find one more and one less and I can recognise and name shapes with four sides.

I can listen attentively and follow instructions with two or more steps.

Literacy

I can use my ideas and imagination to draw pictures, make marks and begin to give meaning to the marks I make.

I can use the sounds I have learnt in phonics to help me read and write simple words by listening carefully to the sounds I can hear.

I know who I can talk to if I am worried.

I show kindness and consideration towards others.

I can hold my pencil with increasing control to help me make marks and begin to form letters in the correct orientation.

Key Vocabulary

I know the meaning of these words:

Season – Winter

Belong

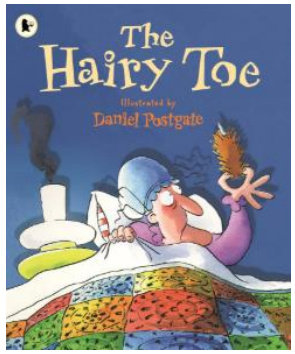

Community

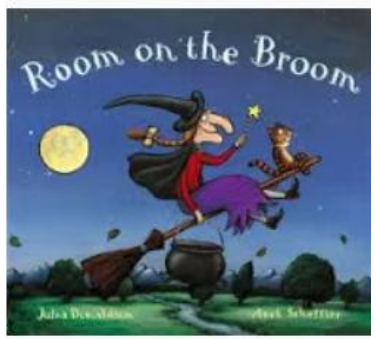

Same

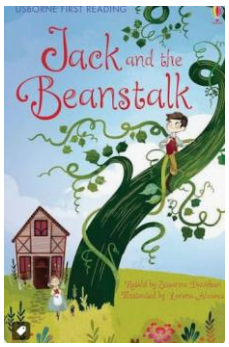

Different

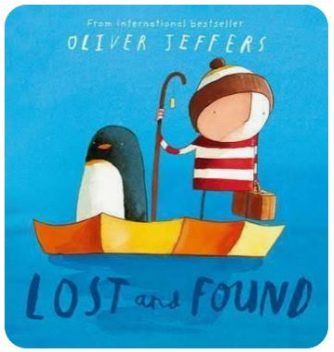

City

Village

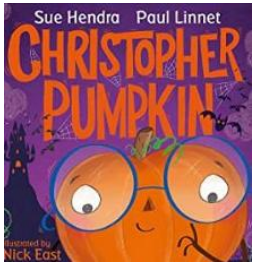

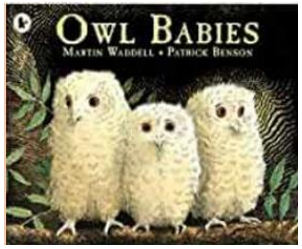

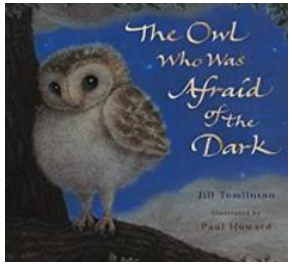

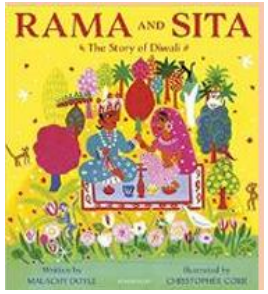

Our drawing club focus books this half term.

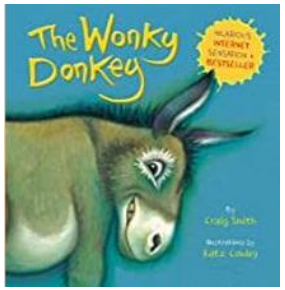

Themed books that we will enjoy this half term!

Links to the wider school curriculum:

I will develop my understanding of the world by exploring my local environment and discovering what makes Yorkshire special! Through walks, discussions, maps and photographs, I will learn to notice and talk about the natural and human features of places, compare Leavening with York and begin to understand the world around me.

I will also learn about a healthy diet. I will design and make my own smoothie!

I will develop my understanding of the natural world by exploring animals, including humans and noticing similarities and differences between them. I will learn to name different parts of my body, explore my senses and talk about how we use them to discover and experience the world around us.
